except the last 2...the TMDLs were used for removing waters & the biological data wasn't used to list either - so it is really only the first 4 that they used to add new waters.

Hi Dave,

See below for proposed talking points. As a starting point, I used the talking points developed for EPA's March 15 approval/disapproval action (see attached).

Before sending them to Mark (and Karla?) to review, I thought you may want to review them first. After your review, should I or you forward them to Mark (and then to ODEQ?)? I cc'ed all on the team just in case they want to review the document as well (and are not sick of doing this).

Communications plan to follow.

Cheers,

Jayne
